Roberts Primary School

Maths Curriculum

Year 5

Number- Number and Place Value

Our pupils will be taught to:

- ✓ read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit
- ✓ count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000
- ✓ interpret negative numbers in context, count forwards and backwards with positive and negative whole
 numbers, including through zero
- ✓ round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000
- ✓ solve number problems and practical problems that involve all of the above
- ✓ read Roman numerals to 1000 (M) and recognise years written in Roman numerals.

Number- Addition and Subtraction

Our pupils will be taught to:

- ✓ add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)
- ✓ add and subtract numbers mentally with increasingly large numbers
- ✓ use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy
- ✓ solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.

Number- Multiplication and Division

Our pupils will be taught to:

- ✓ identify multiples and factors, including finding all factor pairs of a number, and common factors of two
 numbers
- ✓ know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers.
- ✓ establish whether a number up to 100 is prime and recall prime numbers up to 19
- ✓ multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers
- ✓ multiply and divide numbers mentally drawing upon known facts
- ✓ divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context
- ✓ multiply and divide whole numbers and those involving decimals by 10, 100 and 1000 Mathematics key stages 1 and 2 33 Statutory requirements
- √ recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3).
- ✓ solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes
- ✓ solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign
- ✓ solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.

Number- Fractions including decimals and percentages

Our pupils will be taught to:

- ✓ compare and order fractions whose denominators are all multiples of the same number
- ✓ identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths
- ✓ recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, 2/5 + 4/5 = 6/5 = 11/5]
- ✓ add and subtract fractions with the same denominator and denominators that are multiples of the same number
- ✓ multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.
- \checkmark read and write decimal numbers as fractions [for example, 0.71 = 71/100]
- ✓ recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents
- ✓ round decimals with two decimal places to the nearest whole number and to one decimal place

- ✓ read, write, order and compare numbers with up to three decimal places
- ✓ solve problems involving number up to three decimal places
- recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal
- \checkmark solve problems which require knowing percentage and decimal equivalents of 1/2 , 1/4 , 1/5 , 2/5 , 4/5 and those fractions with a denominator of a multiple of 10 or 25.

Measurement

Our pupils will be taught to:

- ✓ convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)
- ✓ understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints
- ✓ measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres
- ✓ calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm2) and square metres (m2) and estimate the area of irregular shapes
- ✓ estimate volume [for example, using 1 cm3 blocks to build cuboids (including cubes)] and capacity [for example, using water]
- ✓ solve problems involving converting between units of time
- ✓ use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling.

Geometry- Properties of Shapes

Our pupils will be taught to:

- √ identify 3-D shapes, including cubes and other cuboids, from 2-D representations
- √ know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles
- ✓ draw given angles, and measure them in degrees (o)
- ✓ identify:
 - angles at a point and one whole turn (total 360o)
 - angles at a point on a straight line and 2 1 a turn (total 1800)
- ✓ other multiples of 90o
- ✓ use the properties of rectangles to deduce related facts and find missing lengths and angles
- ✓ distinguish between regular and irregular polygons based on reasoning about equal sides and angles.

Geometry- Position and Direction

Our pupils will be taught to:

✓ identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.

Statistics

Our pupils will be taught to:

- ✓ solve comparison, sum and difference problems using information presented in a line graph
- ✓ complete, read and interpret information in tables, including timetables.
